Profile

I'm a MERN stack developer proficient in MongoDB, Express.js, React, and Node.js, with a strong focus on building responsive and user-centric web applications. Recently, I've been expanding my expertise into Generative AI by building applications that combine the power of AI with the flexibility of the MERN stack. Alongside this, I'm actively learning Java and Data Structures & Algorithms (DSA) to enhance my problem-solving and system design capabilities.

Education

08/2024 – present Deon, Bathinda, India	**Bachelor of Technology** *BFCET* ↗
2022 – 2024 Bathinda, India	**PCM** *Rose marry convent school*
